Question 1)

Make a HTML file like the image below (fill it with your own information):

It should always stay at center (help: use margin)

It should have a title

It should be using an external CSS file (don't forget to link it)

Use a font except the default font (Adding external fonts have extra points)

Question 2)

Write a factorial recursive function using PHP

Question 3)

Write a code using PHP that takes a string as input and then save that string in an array (character by character) and print it like the image below (there is a function for this type of printing):

Question 4)

Write a function that takes a number as an argument and then check it using regex. It should be like this:

99 - - - - - - or 98 - - - - - - or 97 - - - - - - or 96 - - - - - -
